

Argonne's support of FCC

A. Paramonov on behalf of ANL team
09/10/2026

Summary

- Several staff members are contributing at the level of DOE guidance. Ian Dyckes is further expanding Argonne's contribution.
- There are lab program/projects (such as computing, microelectronics) can be leveraged with careful craftiness
- Lab resources like ALCF can be utilized for detector and physics studies
- The lab management is supportive and a strategic LDRD being prepared (for scope of both PED and Acc). PED scope will initially be for the detector concept optimization.
