## The Frascati Beam Test Facility

*Wednesday, 17 May 2023 14:00 (15 minutes)*

From 2004 the Frascati Beam Test Facility (BTF) in the DAFNE accelerator complex provides to the external user up to  $1E10$  electron per bunch or up to  $1E9$  positron per bunch to develop their detector. After an upgrade program terminated in 2020 of the beam test facility a description of the status and available beam lines will be done.
