

Questions and answers - Martin Hoferichter Lecture

The following questions were submitted through Google Form. Some / all may have been answered in the Q&A session already. Nevertheless, we request our lecturers to provide written answers here for the benefit of those who could not attend that session. Thank you!

Tau ($g-2$) at Belle-2. How much integrated luminosity is needed to perform this measurement? And at what assumed level of polarization?

Some rough projections are included in Sec. 3 in <https://arxiv.org/pdf/2205.12847> (last two paragraphs).
